Reading task study - 2023

Synthetic document for the discussion UI prototype.

Methods and results

Primary endpoint: between-group retention score difference.

Follow-up: 12 weeks.

Reading-task group retention score: 74.

Comparison group retention score: 70.

No week-24 measurement was collected.

Reading task study - 2025

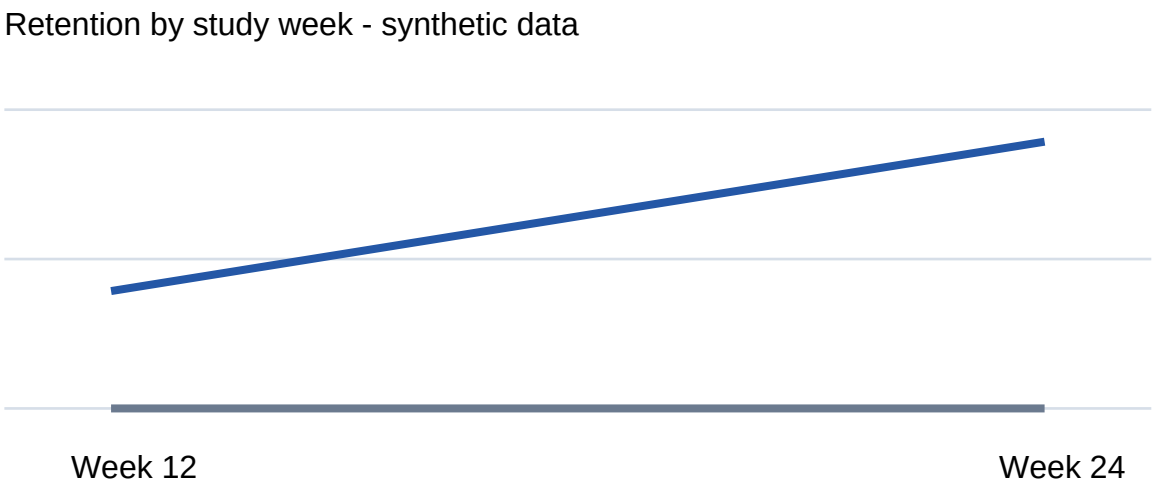
Synthetic document for the discussion UI prototype.

Methods and results

Primary endpoint: between-group retention score difference.

Follow-up: 12 and 24 weeks.

Week 12: reading-task group 74, comparison group 70.

Week 24: reading-task group 79, comparison group 70.


The follow-up duration alone does not establish causality.
